

Simplify Technology and Extend Your Reach.

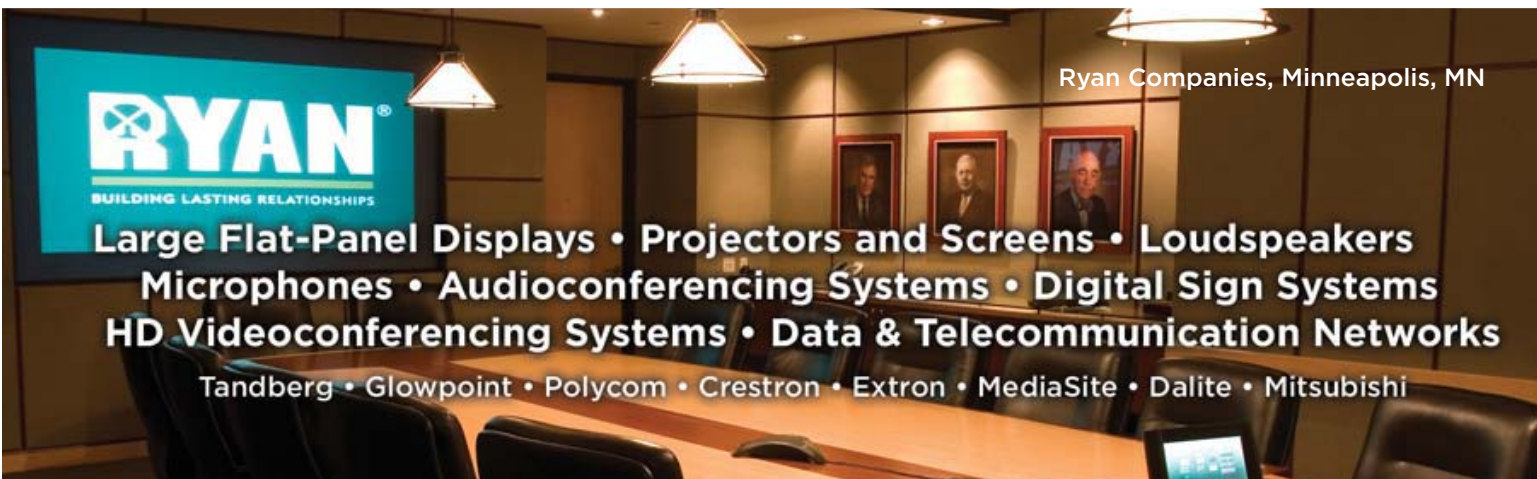

Simplify Technology

Savvy businesses understand the benefits of simplified videoconferencing and multi-media technologies:

- Businesses make better decisions with easy-to-use communication tools
- Remote teams collaborate efficiently - improving competitive positioning
- Training and learning become more convenient, effective, and affordable
- Richer interaction with customers leads to increased business

MSpace works with you to design and maintain professional yet practical solutions to fit your meeting room and audiovisual technology needs. We offer a complete suite of managed services providing on-site technical support, event support, remote audio-visual management, helpdesk and emergency after-hours support.

At MSpace, our focus is on making technology accessible and easy to navigate. We understand that we have not provided a complete solution until every user is achieving their desired communication results. We look forward to providing the very best integrated and simplified technologies - allowing companies like yours to extend their reach.

Who is MSpace?

MSpace is a full-service audiovisual systems provider, offering superior turnkey system design and integration services. From business needs assessment to user training and complete room support, MSpace will work with you to design a meeting space that will foster creativity and build teamwork within your organization.

Our certified designers, engineers and sales professionals are experts in audio, video and IP communication, as well as organizational communication and room design. With our thorough understanding of technology and business strategy, MSpace helps companies and organizations effectively communicate with dispersed audiences using multimedia collaboration.

Featured MSpaces

Medical Facility:

North American Spinal Society • Chicago, IL

MSpace engineered a ground-up, custom-built audiovisual solution to compliment the needs and functionalities set forth by the customer, encompassing their vision of training and collaboration in their conference rooms, laboratory, auditorium and corridor museum. Technology applications include:

- Automatic camera tracking
- Simultaneous live and on-demand recording and archiving of video, audio and computer images from multiple locations
- Digital signage with remote management tools
- Complete system control via touch-panels

Venture Capital Firm:

Norwest Venture Partners • Palo Alto, CA

MSpace designed four conference rooms that are aesthetically elegant and technology rich, allowing Norwest Venture Partners to utilize professional multi-media environments to support employees and serve customers - allowing them to schedule more simultaneous meetings. The upgraded technologies in these new spaces include more bandwidth for VTC, High Definition imaging, and larger, brighter LCD screens creating the highest level of videoconferencing quality.

“With the help of MSpace, we have a state-of-the-art AV infrastructure that is second to none.”

Eric Muehlbauer, Executive Director, North American Spine Society

“We were looking for something impactful and current; we wanted to achieve the new age of technology in our workplace, and MSpace helped us achieve just that. What MSpace helped us do has been an overwhelming success.”

Bob Parr, Director of Development, Ryan Companies US, Inc.

“A primary strength of MSpace is that their upper management team is consistently involved with the integration project working in tandem with their frontline, seeing the project to completion. MSpace creates a personable business relationship with their client; they want to ensure that their service makes a lasting effect.”

Rob Bedal, IT Director, Norwest Venture Partners
