

## Environmental Issues

---

### Mitsubishi Digital Electronics America and the Environment

---

The 21st century is the "Century for the Environment." Environmental concerns continue to grow while new laws and social systems try to keep pace.

Mitsubishi Electric is committed to improving the environment. We have increased the energy effectiveness of our products, materials and processes. It's our pledge to devote the time, resources and innovation to developing leading-edge products, and improve the environment for the people who make and enjoy them.

### Recycling Your Electronic Products

---

LAMPS INSIDE MANY OF OUR PRODUCTS CONTAIN MERCURY AND MUST BE RECYCLED OR DISPOSED OF ACCORDING TO LOCAL, STATE OR FEDERAL LAWS. Your Owner's Guide will note whether or not your product contains a Mercury bulb. For disposal or recycling information, please contact your local authorities or the Electronic Industries Alliance at [www.eiae.org](http://www.eiae.org). Additional information is available at [www.lamprecycle.org](http://www.lamprecycle.org).

The Electronic Industry Alliance's Consumer Education Initiative is the premier resource for consumers that wish to find local opportunities for recycling electronics. These opportunities include state and local collection programs, charitable organizations, and recyclers that accept used electronics. To learn about the recycling opportunities near you please visit [www.eiae.org](http://www.eiae.org).

### California

---

The State of California has adopted the Electronic Waste Recycling Act of 2003, which will require mandatory collection of an advanced recycling fee on the initial sale of certain electronic products. Electronic products are subject to the recycling fee effective January 1, 2005. To learn more please visit [www.ecycle.org](http://www.ecycle.org).
